

Dear Visitors!

You can pay for your order online using payment methods provided by Uniteller payment service. After order confirmation you will be redirected on [Uniteller](#) secure page where you have to enter data required to pay for order. An electronic receipt with order information and payment details will be sent at your email after successful payment.

Security guarantees.

Uniteller's processing security is approved by a data security standard of the payment card industry certificate PCIDSS. Service reliability is ensured by intellectual system of fraudulent operations monitoring together with 3D Secure technology of internet payment security.

Your card data is entered on special secure payment page. Data transfer to the Uniteller [processing company](#) is performed using TLS encryption technology. Subsequent data transfer is carried out via bank's private channels with the highest safety level.

Uniteller does not transfer your card data to the shop or to the third parties!

If your card supports 3D Secure technology you will have to pass an additional user verification at the issuing bank (the bank that issued your card) in order to make a payment. To perform the verification you will be redirected to the bank page. Verification method depends on bank. Typically, it is an additional password sent via SMS or alternate codes card or other methods.

If you have any questions, feel free to contact Uniteller processing center technical support team by email support@uniteller.ru or by phone: 8(800)100-19-60.
